

Improve Your Quality of Life...the Natural Way

In today's modern world, our lives are full of stress and anxiety, ultimately weakening our immune system. Stress increases our susceptibility to disease and illness. We have created a life that is getting more mechanical, that is, our behaviours are automatic and without thought. This creates a sedentary lifestyle that lacks motivation, drive and vigour. Our health and energy levels are directly affected by our state of mind.

Do not settle for a life built on mediocrity. Thanks to Fortizel®, a groundbreaking supplement, you can regain all the required energy needed to live a life full of strength, vitality and empowerment.

What is Fortizel®?

Fortizel® is a medicinal compound made up of Augmentsodine® Colostrum Extract. Colostrum is a powerful collection of amazing nutrients that provide newborn mammals (including humans) immune competence. It contains several vitamins, minerals and most importantly, antibodies. Fortizel's Augmentsodine Colostrum Extract is 10-20 times more powerful than regular Colostrum.

What Are The Main Functions Of Colostrum Extract?

Colostrum Extract regulates your immune system. If your immune system is too weak, Fortizel® works to strengthen it. If your immune system is overactive, causing allergies and other autoimmune diseases (such as rheumatism, multiple sclerosis, eczema etc.), Fortizel® helps to normalize it.

Colostrum contains natural growth factors. These ensure a quick recovery and normal cell division. Fortizel® improves your immune function, the integrity of your gastro-intestinal tract, the effectiveness of your neuro-endocrine system and the correct functioning of your muscles.

In short, Fortizel® is a gift...the gift of renewed activity levels and improved quality of life. You will feel energized, healthy and motivated to participate in your life, instead of observe from the sidelines.
